Room H-920, Hall Building, 1455 de Maisonneuve  
Blvd., Sir George Williams Campus, Concordia  
University.

LEWIS AUERBACH

TECHNOLOGY AND AGING

A discussion of the implications, for technology and society, of the fact that our society is becoming rapidly older. In addition, a television documentary on coping with old age, produced by Mr. Auerbach and directed by Don Shebib, will be shown.

Lewis Auerbach: received his Harvard A.M. in History of Science in 1964. He continued at Harvard as a doctoral student and Teaching Fellow and did research for the Oral History of Nuclear Physics Project of the American Institute of Physics. Between 1967 - 71 he worked as a Producer for the C.B.C., mainly for the IDEAS series and as coordinator of the Oral History Project and served as president of the C.B.C. Radio Producers' Association. Since 1971, Mr. Auerbach has been a "Project Officer" (i.e. producer) at Ontario Educational Television (OECA) and produced numerous programmes. This year he is on secondment to the Science Council of Canada as a Science Adviser and in addition to his work on Aging, he is exploring the possibilities of alternative media for promoting public discussion in areas of Science Council concern.
